April 2012

**Vehicle Identification Number (VIN):** 1VWCH

**Subject:** Customer Satisfaction Campaign 9119/V9  
Radio Software Update  
2012 Model Year Volkswagen Vehicles with RNS 510 Radio w/ Navigation

Dear Volkswagen Owner:

As part of Volkswagen's ongoing commitment to customer satisfaction and vehicle reliability, we are writing to let you know about a free-of-charge software update that is available for the RNS 510 radio in your vehicle.

**What are the benefits of this software update?**  
The new system software addresses some customer satisfaction issues, and adds new features and functions, such as:

- Addition of SiriusXM Travel Link® capability (please contact SiriusXM for subscription information. Adding TravelLink® to your satellite radio subscription can only be done after the three-month free satellite radio trial period has ended)
- Addition of channel art to the radio display
- Optimized touch screen performance
- Provides improved voice control accuracy for telephone function (if desired)

**IMPORTANT!**  
*The new system software improves voice control accuracy, but restricts voice control function to the telephone only. Original voice control for functions like the radio, CD, etc. can be reinstated through coding; however if this is done there will be no improvement to voice control accuracy for any function. Please let your dealer know if you would like the original or improved voice control feature (as described above) when you bring your vehicle in for this service.*

**What We Would Like You to Do**  
Please contact your authorized Volkswagen dealer to schedule a service appointment at your convenience. This work will take less than two hours and, as mentioned above, will be performed for you free of charge. Please keep in mind that,
